Stamp 1G permission valid to 30 Apr 2027 | Immediate start | Open to relocate across Ireland
Own car and full Irish driving licence

PROFILE

Dublin-based software engineer building containerised, multi-service systems with explicit verification and deployment boundaries. Works across Rust, Go, Python, Java and .NET services, event-driven integration, Docker Compose, Kubernetes manifests, guarded Terraform and cross-language CI without overstating reference infrastructure as a live cloud deployment.

TECHNICAL SKILLS

Languages: TypeScript, Python, Rust, Go, Java, C#/.NET, SQL

Services and messaging: FastAPI, Spring Boot, GraphQL, WebSockets, Kafka, RabbitMQ, Redis

Platform and delivery: Docker, Docker Compose, Kubernetes, Terraform, GitHub Actions, CI/CD, Jenkins

Data and security: PostgreSQL, event-driven architecture, authentication, authorization, OWASP, technical documentation

PROFESSIONAL EXPERIENCE

Software Engineer (Full-Stack) - Outstanding Marketing

Remote - Germany | Feb 2025 - May 2026 | outstanding-marketing.de/en

- Delivered React and TypeScript interfaces, internal dashboards and Node.js API integrations for remote e-commerce and growth workflows.
- Automated recurring reporting and QA checks, centralising release visibility and reducing manual review.
- Translated stakeholder requirements into scoped tasks, implementation updates and reviewable product releases across a remote team.

Software Engineer - LocalhostLabs

Pakistan | Jun 2024 - Dec 2024 | localhostlabs.tech

- Built responsive web features and REST-connected backend workflows across client applications, APIs and databases.
- Investigated defects, documented technical workflows and supported Git, QA triage and release handoffs in a consultancy environment.

Associate Software Engineer - Octans Digital (OD)

Islamabad, Pakistan | Nov 2020 - Apr 2024 | octans.ai

- Supported assigned software development tasks across team projects.

SELECTED ENGINEERING PROJECTS

VaultWatch - Polyglot AI and Security Operations Platform

Stack: Rust/Axum, Go, Python/FastAPI, scikit-learn, Next.js/TypeScript, PostgreSQL, Redis, Docker Compose, GitHub Actions
Live showcase | GitHub source

- Built a four-service fraud and account-security platform spanning Rust risk scoring, Go authentication and anomaly detection, and a Python/FastAPI multi-agent pipeline with the Anthropic SDK and bounded tool use, surfaced through a Next.js operations dashboard.
- Added deterministic replay, synthetic-data boundaries and cross-language CI; full Docker Compose verification exposed and fixed persistence-serialization and WebSocket cleanup defects.

Doctor System - Attributed Polyglot Platform Modernisation

Stack: Java/Spring Boot, C#/.NET, Go, Kafka, RabbitMQ, GraphQL, Docker, Kubernetes, Terraform, Jenkins
Project site | GitHub source

- Modernised an Apache-2.0 prototype into an attributed appointment reference platform with a Java/Spring Boot core, .NET/RabbitMQ notifications and a Go/Kafka audit projection.
- Added GraphQL/REST, container builds, Kubernetes overlays and guarded Terraform plus CI validation; the infrastructure remains a reviewed reference implementation, not a production cloud deployment.

HouseFair - Shared-Living Full-Stack Product

Stack: Next.js 16, React 19, TypeScript, Supabase Auth/PostgreSQL/RLS, Zod, Playwright, PWA
Live product | GitHub source

- Designed and deployed an installable household workspace for recurring chores, groceries, shared expenses and calmer issue workflows.
- Enforced server-resolved household membership with PostgreSQL RLS as a second boundary; 12 mobile Playwright checks pass across Android and iPhone PWA viewports.

EDUCATION

MSc Cybersecurity - National College of Ireland, Dublin | 2025 - 2026 | Graduated April 2026

BSc Computer Science - FAST NUCES, Pakistan | 2020 - 2024
