

Uzair Waseem

Software Engineer | Full-Stack & Backend | Testing & Security-Aware Delivery

Ireland-based | +353 89 973 9932 | uzairwaseem29@gmail.com
Portfolio: <https://uzairwaseem.com> | LinkedIn: <https://linkedin.com/in/uzair-waseem> | GitHub: <https://github.com/Assembler-Fourier>

PROFESSIONAL SUMMARY

Ireland-based software engineer focused on full-stack and backend product delivery. Strongest stack includes React, Next.js, TypeScript, Node.js, Python/FastAPI, PostgreSQL, REST APIs, Docker, GitHub Actions, and automated testing. MSc Cybersecurity adds practical strength in secure SDLC, authentication, authorization, validation, and risk-aware engineering.

TECHNICAL SKILLS

- Frontend:** React, Next.js, TypeScript, JavaScript, Tailwind CSS
Backend: Node.js, Express, Python, FastAPI, REST APIs, authentication, authorization, validation
Databases: PostgreSQL, MongoDB, SQL, Prisma, SQLAlchemy
Testing: Playwright, Selenium, Cypress, Jest/Vitest, Pytest, Supertest, API testing, regression testing
DevOps: Docker, Docker Compose, GitHub Actions, CI/CD, Linux, Vercel, Render/Fly.io/Railway, basic AWS/Azure
Security-aware delivery: OWASP basics, secure SDLC, input validation, secrets handling, role-based access, risk-aware design

PROFESSIONAL EXPERIENCE

Software Engineer - Motion Sensors

- Remote - Canada | Mar 2026 - Present
- Build backend APIs, automation workflows, and testable service logic for distributed product delivery.
 - Develop Python/FastAPI prototypes for risk ranking, document workflows, and structured data processing.
 - Support Dockerized services, CI/CD-aware delivery, documentation, and secure SDLC practices for reviewable engineering work.

Software Engineer (Full-Stack) - Outstanding Marketing

- Remote - Germany | Feb 2025 - Jan 2026
- Shipped React/TypeScript dashboards and web product features backed by Node.js services and third-party API integrations.
 - Converted stakeholder requirements into scoped tasks, delivery updates, and reviewable work across remote teams.
 - Added reporting automation and QA checks to improve visibility into releases and reduce repeated manual review.

Junior Software Engineer - LocalhostLabs

- Pakistan | Jun 2024 - Dec 2024
- Built front-end and back-end features across web applications, APIs, databases, and responsive interfaces.
 - Fixed defects, documented workflows, used version control, and supported QA triage and technical support tasks.

SELECTED PROJECTS

SecureTaskOps Workflow Platform

- Stack: Node.js, REST APIs, Docker, GitHub Actions, tests
GitHub: <https://github.com/Assembler-Fourier/securetaskops-workflow-platform>
- Built a workflow API for tasks, incidents, and release-readiness signals with validation, risk scoring, unit tests, Docker setup, GitHub Actions CI, security notes, and reviewer-friendly documentation.

SentryScan Threat Monitoring

- Stack: Python, FastAPI, risk scoring, security-event modeling, tests
GitHub: <https://github.com/Assembler-Fourier/sentryscan-threat-monitoring>
- Built a FastAPI security-event triage prototype that normalizes event payloads, applies rule-based risk scoring, returns explainable severity decisions, and documents limitations honestly.

QA Automation Lab

- Stack: Playwright, API testing, GitHub Actions
GitHub: <https://github.com/Assembler-Fourier/qa-automation-lab>
- Created a Playwright API testing suite for SecureTaskOps covering health checks, task filtering, release-readiness behavior, validation errors, task creation, and CI report artifacts.

Portfolio Website

- Stack: Next.js, React, TypeScript, SEO, Vercel
GitHub: <https://github.com/Assembler-Fourier/uzair-waseem-portfolio>
- Built and deployed a recruiter-focused portfolio with project case studies, SEO metadata, contact links, CV download, and links to live engineering proof.

EDUCATION

- MSc Cybersecurity, National College of Ireland, Dublin | 2025 - 2026
BSc Computer Science, FAST NUCES, Pakistan | 2020 - 2024

AVAILABILITY

Open to software engineering roles across Ireland, including Dublin, Cork, Galway, Limerick, Waterford, remote, and hybrid teams.
