PROFESSIONAL SUMMARY

Ireland-based software engineer targeting QA automation and software engineering roles. Experienced with Playwright, Selenium, API testing, GitHub Actions, testable backend logic, and documentation. Cybersecurity background supports stronger risk, authentication, and reliability thinking.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, responsive UI, accessibility

Backend: Node.js, Express.js, Python, FastAPI, REST APIs, SQL, PostgreSQL, MongoDB

Testing: Playwright, Selenium, API testing, unit testing, integration testing, test automation

DevOps/Cloud: Docker, GitHub Actions, CI/CD, AWS basics, Azure basics, Linux, Vercel

Security: OWASP basics, secure SDLC, authentication, authorization, input validation, threat modeling basics

AI/Data: RAG prototypes, LangChain basics, vector search basics, Python data workflows

PROFESSIONAL EXPERIENCE

Software Engineer - Motion Sensors | Remote - Canada | Mar 2026 - Present

- Build software features, APIs, and automation workflows for distributed product delivery.
- Develop Python/FastAPI prototypes for risk ranking, document workflows, and testable backend logic.
- Support Dockerized services, CI/CD-aware delivery, automated testing, and secure SDLC practices.

Software Engineer / Automation Engineer - Outstanding Marketing | Remote - Germany | Feb 2025 - Jan 2026

- Built responsive web products and dashboards using React, TypeScript, Node.js, and third-party APIs.
- Implemented reporting automation and QA checks using GitHub Actions, Docker, and test scripts.
- Collaborated with stakeholders to clarify requirements, break work into tasks, and deliver practical features.

Junior Software / QA Engineer - LocalhostLabs | On-site - Pakistan | Jun 2024 - Dec 2024

- Built frontend and backend features, fixed defects, and supported sprint delivery for client web applications.
- Wrote tests, documented workflows, and supported version control, QA triage, and technical support tasks.
- Worked across databases, APIs, and responsive interfaces while strengthening software engineering fundamentals.

SELECTED PROJECTS

SecureFlow Delivery Dashboard - Built a delivery dashboard case study that turns sprint, blocker, QA, and release-readiness signals into a simple status view for engineering and stakeholder review.

github.com/Assembler-Fourier/secureflow-delivery-dashboard

TaskForge Workflow App - Built a Node.js workflow app for task tracking and sprint summaries, including REST-style routes, task-state modeling, lightweight UI rendering, and documented setup instructions.

github.com/Assembler-Fourier/taskforge-workflow-app

SentryScan Threat Monitoring - Built a FastAPI-based security event triage prototype that normalizes event payloads, applies risk scoring, returns explainable severity decisions, and includes tests for scoring logic.

github.com/Assembler-Fourier/sentryscan-threat-monitoring

SELECTED PROJECTS CONTINUED

Portfolio Website - Built a recruiter-focused Next.js portfolio deployed on Vercel with SEO metadata, downloadable CV, responsive layout, and project links.

github.com/Assembler-Fourier/uzair-waseem-portfolio

DocuMind RAG Assistant - Built a local document retrieval assistant that chunks knowledge files, ranks relevant context, returns citations, and demonstrates transparent retrieval logic for RAG-style workflows.

github.com/Assembler-Fourier/documind-rag-assistant

EDUCATION

MSc Cybersecurity - National College of Ireland | 2025 - 2026

Focus: secure systems, authentication, risk, networks, governance, and secure SDLC.

BSc Computer Science - FAST NUCES | 2020 - 2024

Focus: software engineering, databases, algorithms, web systems, and computer science foundations.

RECRUITER KEYWORDS

QA Automation Engineer Ireland, Test Automation Engineer, Playwright, Selenium, API testing, CI/CD, React, Next.js, TypeScript, JavaScript, Node.js, Express, Python, FastAPI, REST APIs, SQL, PostgreSQL, MongoDB, Docker, GitHub Actions, CI/CD, Playwright, Selenium, API testing, secure SDLC, OWASP, authentication, authorization, Ireland, Dublin, Cork, Galway, Limerick, Waterford, remote, hybrid.

ROLE FOCUS

- Primary: Software Engineer, Full-stack Engineer, Backend Engineer.
- Supporting: QA Automation Engineer and security-aware software roles.
- Location: Open to Dublin, Cork, Galway, Limerick, Waterford, and remote/hybrid teams in Ireland.
