PROFESSIONAL SUMMARY

Ireland-based software engineer focused on full-stack development, backend APIs, automation, testing, and secure delivery. Experienced with React, Next.js, TypeScript, Node.js, Python, FastAPI, SQL, Docker, GitHub Actions, and QA automation. MSc Cybersecurity candidate with a strong computer science foundation and practical interest in secure SDLC, API reliability, and maintainable software delivery.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, responsive UI, accessibility
Backend: Node.js, Express.js, Python, FastAPI, REST APIs, SQL, PostgreSQL, MongoDB
Testing: Playwright, Selenium, Cypress, API testing, unit testing, integration testing
DevOps/Cloud: Docker, GitHub Actions, CI/CD, AWS basics, Azure basics, Linux, Vercel
Security/AI: OWASP basics, secure SDLC, authentication, authorization, RAG prototypes, LangChain basics

PROFESSIONAL EXPERIENCE

Software Engineer - Motion Sensors | Remote - Canada | Mar 2026 - Present

- Build software features, APIs, and automation workflows for distributed product delivery.
- Develop Python/FastAPI prototypes for risk ranking, document workflows, and testable backend logic.

Software Engineer / Automation Engineer - Outstanding Marketing | Remote - Germany | Feb 2025 - Jan 2026

- Built responsive web products and dashboards using React, TypeScript, Node.js, and API integrations.
- Implemented reporting automation and QA checks using GitHub Actions, Docker, and test scripts.

Junior Software / QA Engineer - LocalhostLabs | On-site - Pakistan | Jun 2024 - Dec 2024

- Built frontend/backend features, fixed defects, and supported sprint delivery for web applications.
- Wrote tests, documented workflows, and supported version control, QA triage, and technical support tasks.

SELECTED PROJECTS

SecureTaskOps Workflow Platform - Current flagship build for task, incident, and release-readiness workflows using a documented Node.js service, tests, Docker setup, GitHub Actions, API examples, and security notes.

TaskForge Workflow App - Node.js workflow app for task tracking and sprint summaries, with REST-style routes, task-state modeling, lightweight UI rendering, and documented setup instructions.

SentryScan Threat Monitoring - FastAPI security-event triage prototype that normalizes payloads, applies risk scoring, returns explainable severity decisions, and includes tests for scoring logic.

EDUCATION

MSc Cybersecurity - National College of Ireland, Dublin | 2025 - 2026 | secure systems, risk, networks, governance, secure SDLC
BSc Computer Science - FAST NUCES | 2020 - 2024 | software engineering, databases, algorithms, web systems, CS foundations

RECRUITER KEYWORDS

Full-stack Software Engineer, Backend Engineer, React, Node.js, Python, FastAPI, REST APIs, Ireland, TypeScript, JavaScript, SQL, PostgreSQL, MongoDB, Docker, GitHub Actions, CI/CD, Playwright, Selenium, API testing, secure SDLC, OWASP, authentication, authorization, Dublin, Cork, Galway, Limerick, Waterford, remote, hybrid.

Note: Project claims are intentionally framed as portfolio prototypes, current builds, or case studies unless production metrics are available.
