PROFESSIONAL SUMMARY

Ireland-based software engineer building tested web apps, backend APIs, automation workflows and security-aware delivery. Strongest stack: React, Next.js, TypeScript, Node.js, Python/FastAPI, SQL, Docker and GitHub Actions. MSc Cybersecurity adds practical strength in authentication, secure SDLC, testing, reliability and risk-aware engineering.

Role focus: Full-stack, backend and software engineering across Ireland; supporting fit for QA automation and security-aware software roles.

TECHNICAL SKILLS

Primary stack	React, Next.js, TypeScript, JavaScript, Node.js, Express, Python, FastAPI, SQL, PostgreSQL, MongoDB
APIs & backend	REST APIs, data modeling, authentication/authorization, input validation, reusable service logic, documentation
Testing & QA	Playwright, Selenium, Cypress, API testing, unit tests, integration tests, regression thinking, CI-ready checks
DevOps & cloud	Docker, GitHub Actions, CI/CD, Linux, AWS basics, Azure basics, cloud deployment fundamentals
Security-aware	OWASP basics, secure SDLC, threat modeling basics, secrets handling, risk and reliability mindset

PROFESSIONAL EXPERIENCE

Software Engineer - Motion Sensors

Mar 2026 - Present

Remote - Canada

- Build software features, backend APIs and automation workflows for distributed product delivery.
- Develop Python/FastAPI prototypes for risk-ranking, document workflows and testable backend logic; support Dockerized services, CI/CD-aware delivery and secure SDLC practices.

Software Engineer (Full-Stack) - Outstanding Marketing

Feb 2025 - Jan 2026

Software Engineer Remote - Germany

- Shipped web products and dashboards using React, TypeScript, Node.js and API integrations.
- Automated reporting and QA checks, translated stakeholder requirements into scoped product work, and collaborated through Git, pull requests and code review across time zones.

Junior Software Engineer - LocalhostLabs

Jun 2024 - Dec 2024

On-site - Pakistan

- Built front-end and back-end features, fixed defects and supported sprint delivery across databases, APIs and responsive interfaces.
- Wrote tests, documented workflows and helped with version control, QA and technical support.

SELECTED PROJECTS

SecureTaskOps Workflow Platform Node.js workflow API for tasks, incidents and release-readiness signals with tests, Docker, GitHub Actions and security notes.	SentryScan Threat Monitoring FastAPI prototype that normalizes security-event payloads, applies risk scoring and explains triage reasons for alert review.
TaskForge Workflow App Full-stack workflow app with task-state modeling, REST-style routes and a lightweight board UI for practical product delivery.	SecureFlow Delivery Dashboard Dashboard case study for sprint health, blockers, QA signals and release-readiness communication.

EDUCATION AND RECRUITER SCAN

MSc in Cybersecurity - National College of Ireland, Dublin 2025 - 2026 BSc in Computer Science - FAST NUCES, Pakistan 2020 - 2024 Additional proof: DocuMind RAG Assistant shows document chunking, retrieval ranking and citation-style answers; the portfolio site shows Next.js, SEO metadata, Vercel deployment and recruiter-focused content.	Target roles Software Engineer, Full-stack Engineer, Backend Engineer, QA Automation Engineer Ireland fit Open to Dublin, Cork, Galway, Limerick, Waterford, remote and hybrid teams Review proof GitHub repos with README depth, tests, Docker, CI, security notes and setup commands Keywords React, Node.js, Python/FastAPI, SQL, REST APIs, Playwright, Docker, secure SDLC
--	---

APPLICATION FOCUS

Software / backend Build web apps, REST APIs, workflow logic, SQL-backed features and reviewable services.	Testing / QA Add Playwright/Selenium checks, API tests, regression thinking and CI-ready validation.	Security-aware delivery Apply secure SDLC basics: auth, authorization, input validation, secrets handling and risk notes.
Working style Document setup, tradeoffs and limitations so reviewers can run and judge projects quickly.	Portfolio proof SecureTaskOps, SentryScan, TaskForge, SecureFlow and uzairwaseem.com support the same story.	Availability Open to software engineering roles across Ireland with relocation for the right opportunity.
