

Uzair Waseem

Software, AI & Cybersecurity Engineer - Dublin, Ireland

Dublin, Ireland | uzairwaseem29@gmail.com | +353 89 973 9932 | uzairwaseem.com | linkedin.com/in/uzair-waseem | github.com/Assembler-Fourier

PROFESSIONAL SUMMARY

Dublin-based software, AI and cybersecurity engineer building production-ready web products, data workflows, QA systems and secure delivery pipelines. Strong Computer Science foundation, MSc Cybersecurity in progress, and hands-on work across React, Next.js, Node.js, Python, FastAPI, SQL, cloud automation, testing and secure SDLC. Open to Software Engineer, AI/Data Engineer, Cloud/DevOps, Cybersecurity and QA Automation roles across Ireland, hybrid and remote markets.

CORE SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Frontend: React, Next.js, responsive UI, accessibility, SEO, dashboard UX

Backend & Data: Node.js, FastAPI, REST APIs, PostgreSQL, MongoDB, ETL, Power BI

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Vercel

QA & Automation: Playwright, Selenium, Cypress, API testing, regression testing, Jira

AI & Security: PyTorch, scikit-learn, Hugging Face, LangChain, RAG, vector search, OWASP, secure SDLC, threat modeling, SIEM, ISO 27001, NIST CSF, GDPR

PROFESSIONAL EXPERIENCE

Software / AI Engineer - Motion Sensors | Remote - Canada | Mar 2026 - Present

- Build ML-backed product features, APIs and automation workflows for distributed product delivery.
- Develop risk-ranking, anomaly-detection and document-workflow prototypes using Python, FastAPI and model-evaluation patterns.
- Support Dockerized services, CI/CD-aware delivery, automated testing and secure SDLC practices across product work.

Software Engineer / Automation Engineer - Outstanding Marketing | Remote - Germany | Feb 2025 - Jan 2026

- Shipped responsive web products and dashboards using React, TypeScript, Node.js and third-party API integrations.
- Automated reporting, QA checks and delivery workflows with GitHub Actions, Docker and test automation.
- Translated stakeholder requirements into scoped user stories, release updates and practical delivery plans for remote teams.

Junior Software / QA Engineer - LocalhostLabs | On-site - Pakistan | Jun 2024 - Dec 2024

- Built frontend and backend features, fixed defects and supported sprint delivery for client web applications.
- Wrote tests, documented workflows and supported version control, QA triage and technical support tasks.
- Worked across databases, APIs and responsive interfaces while strengthening software engineering fundamentals.

SELECTED PROJECT REPOSITORIES

SentryScan Threat Monitoring - Risk-ranked security event triage prototype with anomaly scoring, FastAPI endpoint and CI tests.

Stack: Python, FastAPI, security events, SIEM-style triage | github.com/Assembler-Fourier/sentryscan-threat-monitoring

TaskForge Workflow App - API-first workflow board with task states, sprint summaries and a rendered product view.

Stack: Node.js, JavaScript, REST-style APIs, workflow modeling | github.com/Assembler-Fourier/taskforge-workflow-app

SecureFlow Delivery Dashboard - Delivery analytics dashboard for sprint health, blocker pressure, QA confidence and release readiness.

Stack: Node.js, dashboards, CI/CD signals, release readiness | github.com/Assembler-Fourier/secureflow-delivery-dashboard

SELECTED PROJECT REPOSITORIES CONTINUED

DocuMind RAG Assistant - Document retrieval assistant with chunking, transparent scoring, citations and answer drafting.

Stack: Python, RAG architecture, document retrieval | github.com/Assembler-Fourier/documind-rag-assistant

Portfolio Website - Recruiter-focused Next.js portfolio deployed on Vercel with SEO metadata and project links.

Stack: Next.js, React, TypeScript, Vercel, SEO | github.com/Assembler-Fourier/uzair-waseem-portfolio

EDUCATION

MSc Cybersecurity - National College of Ireland, Dublin | 2025 - 2026

Focus: secure systems, risk, networks, governance and secure delivery.

BSc Computer Science - FAST NUCES, Pakistan | 2020 - 2024

Focus: software engineering, databases, algorithms, AI/data foundations and systems.

RECRUITER KEYWORDS

React, Next.js, TypeScript, JavaScript, Node.js, Python, FastAPI, SQL, PostgreSQL, MongoDB, REST APIs, GitHub Actions, Docker, Kubernetes, AWS, Azure, Terraform, CI/CD, Playwright, Selenium, Cypress, API testing, QA automation, PyTorch, scikit-learn, Hugging Face, LangChain, RAG, vector search, ETL, dashboards, OWASP, secure SDLC, threat modeling, SIEM, ISO 27001, NIST CSF, GDPR, Jira, Confluence, Power BI, ITIL.

ROLE FIT

- Software / Full-stack Engineer: product interfaces, APIs, data models, testing and secure releases.
- AI / Data Engineer: Python workflows, retrieval systems, model evaluation, data pipelines and dashboards.
- Cloud / DevOps Engineer: containers, CI/CD, cloud deployment paths, monitoring and infrastructure automation.
- Cybersecurity Engineer: secure SDLC, OWASP, threat modeling, risk context, SIEM-style monitoring and governance.
- QA Automation Engineer: Playwright/Selenium/Cypress, API testing, regression checks and defect triage.
