

Uzair Waseem

QA AUTOMATION ENGINEER | PLAYWRIGHT, TYPESCRIPT, API TESTING AND CI/CD

Dublin, Ireland | uzairwaseem29@gmail.com

uzairwaseem.com | linkedin.com/in/uzair-waseem | github.com/Assembler-Fourier

PROFESSIONAL SUMMARY

Dublin-based QA automation and software engineer with remote delivery experience. Builds Playwright browser and API suites with isolated data, negative checks, accessibility coverage and CI evidence; product-engineering experience supports defect investigation across React interfaces, Node.js APIs and PostgreSQL workflows.

TECHNICAL SKILLS

Automation: Playwright, TypeScript, browser E2E, APIRequestContext, smoke, regression and negative testing

Test design: Fixtures, page objects, stable locators, data isolation, route mocking, traces, screenshots, HTML reports

Quality: Accessibility testing, axe-core, Vitest, Pytest, defect investigation, test triage

CI and delivery: GitHub Actions, parallel execution, retries, Node.js, npm, Docker, Vercel, CI/CD

Product stack: React, Next.js, REST APIs, PostgreSQL, Supabase, authentication, authorization, RLS

PROFESSIONAL EXPERIENCE

Software Engineer (Full-Stack) - Outstanding Marketing

Remote - Germany | Feb 2025 - May 2026 | outstanding-marketing.de

- Delivered React and TypeScript web features, internal dashboards and Node.js/API integrations for remote e-commerce and growth workflows.
- Automated reporting and repeatable QA checks to improve release visibility and reduce manual review.
- Converted stakeholder requirements into scoped tasks, delivery updates and reviewable product work.

Junior Software Engineer - LocalhostLabs

Pakistan | Jun 2024 - Dec 2024 | localhostlabs.tech

- Built responsive front-end and back-end features across web applications, APIs and databases.
- Fixed defects, documented workflows and supported version control, QA triage and release handoffs in a consultancy delivery environment.

SELECTED ENGINEERING PROJECTS

QA Automation Lab - Browser and API Release Contracts

Stack: Playwright, TypeScript, APIRequestContext, axe-core, fixtures, page objects, GitHub Actions

[CI workflow](#) | [GitHub source](#)

- Built 26 browser and API contracts covering public portfolio evidence, live read-only product boundaries and an isolated writable workflow target.
- Separated smoke and negative checks from opt-in writes, with role-based locators, route interception, accessibility checks, traces, screenshots and HTML reports.

HouseFair - Shared-Living Full-Stack Product

Stack: Next.js 16, React 19, TypeScript, Supabase Auth/PostgreSQL/RLS, Zod, Playwright, PWA

[Live product](#) | [GitHub source](#)

- Built an installable household workspace for recurring chores, groceries, shared expenses and calmer issue workflows.
- Scoped authenticated requests by household membership with PostgreSQL RLS as a second boundary; 12 mobile Playwright checks pass across Android and iPhone PWA viewports.

Roster Command - Public Scheduling Logic Extract

Stack: TypeScript, Vitest, synthetic fixtures, domain modeling, GitHub Actions

[Recruiter demo](#) | [GitHub source](#)

- Published selected and sanitised domain logic from a private roster system with no employer, employee or client data.
- Hardened overlap, overnight and multi-day shift handling, lifecycle restrictions, deterministic ranking and same-name employee matching; 23 tests pass.

EDUCATION

MSc Cybersecurity - National College of Ireland, Dublin | 2025 - 2026

BSc Computer Science - FAST NUCES, Pakistan | 2020 - 2024

AVAILABILITY

Open to graduate and junior QA automation, SDET and software-engineering roles across Ireland, including hybrid and remote teams.
